FREE HAUL-OUT COURTESY OF OCEANLED® — BUY FOUR OCEANLED LIGHTS AND GET UP TO \$1000 OFF OF HAUL OUT/IN

Pioneer in Innovative Marine Lighting Partners With Leader In Anti-Fouling Paint — Launching Incredible Spring Promotion Benefiting Retail Partners and Consumers Alike

With spring commissioning on the minds of many boat owners, OceanLED® is now offering a brilliant deal that is too good to pass up. When customers buy any four OceanLED 3010 Pro Series™ Lights from an authorized dealer, either Flush Mount or Thru Hull, of any color and any lens option, OceanLED will pay the freight for haul-out or haul-in costs anywhere in the U.S. up to \$1,000 per boat.

This incredible offer is available to the first 250 participants and is the perfect way for boat owners to improve the beauty and value of their boat with OceanLED's exceptional lighting solutions. And in conjunction with Interlux, savvy boat owners can take advantage of this valuable promotion by getting their vessel bottom painted or make other key improvements at the same time.

This program is also the kick-off for a nationwide competition for participating boat yards and dealers — at the end of the initial promotion running April 1 through June 30, 2009, OceanLED will announce the winners of the OceanLED Preferred Dealer/Boatyard Program. The winners will be selected from dealers and boat yards that participate in the Haul-In/Out promotion and will be based on several criteria to be announced, as well as on volume of sales. These Preferred Dealers will be eligible for special product considerations and other benefits, including the option of offering the rebate for haul-outs for the rest of the year.

OceanLED already has a history of setting a shining example in the industry. The OceanLED 3010 Pro Series led the market back in 2006 as a revolutionary new option for a 1" Thru Hull — perfect for yachts that needed lighting solutions, but couldn't accommodate a 4" hole or have access for requisite bulb changes for traditional lights. Since then, boat owners have been lighting up the docks and the water with the company's sizzling blue, white or green LED lights. They not only attract fish and admiring looks from fellow boaters, these versatile lights are perfect for vessels from 25-500', and provide considerably more light than a comparable halogen, Xenon and HID bulbs, while drawing just a fraction of the power.

The OceanLED 3010 Pro Series lights are available with two lens options (50 degree and a 180 degree flood) they are treated with an ultra-tough Tritonium lens coating and can even come with a delrin isolating sleeve for use on

metal hulls. Plus, all OceanLED Pro-Series lights are Lloyds, RINA, ABS approved, Ignition Protected, and ABYC H-27 side load compliant.

Those interested in taking advantage of the most technologically advanced lighting systems in the industry and this attractive offer can simply purchase the lights, and then download and fill out a simple form from **www.oceanled.com**, and send their haul-out/in bill to OceanLED to receive their rebate. Interested boat yards/dealers can download a form for eligibility on the company's site, as well.

For more information on the OceanLED Haul-Out/In Promotion or the company's line of innovative underwater lighting systems, contact Ocean LED at 2019 SW 20th St., Suite 101, Fort Lauderdale, FL 33315 • Telephone: (954) 523-2250 • Or visit online at: **www.oceanled.com**.
