

# F-Series to Explore E8 Upgrade Kit

UNDERWATER LIGHT REFIT SOLUTION

**Improved  
Fixture  
Lumens**

**Advanced  
Optics**

**Ultra  
Reliable**

**Easy  
Install**

The F-Series to Explore E8 Upgrade Kit has been specifically developed to enable superyachts with F-Series underwater lights to upgrade their existing underwater lighting solution, easily and without the need to replace the existing cofferdams. The easy to install upgrade kit fits directly into the existing cofferdam, allowing the Explore E8 light cartridge to be installed without the need to haul the yacht. Available in two versions, the owner or captain has the option to replace the seals and lens at the same time, further improving longevity.

## COST EFFECTIVE SOLUTION

The F-Series to Explore E8 Upgrade Kit is an incredibly cost-effective upgrade solution. By removing the need to cut out the existing cofferdams and weld in replacements, the yard and owner can save substantial amounts of time during any refit process. Coupled with the financial savings of not investing in new cofferdams, the F-Series to Explore E8 Upgrade Kit allows for significant cost savings.

## REDUCED INSTALLATION TIME.

When compared to the average time required for cutting out existing cofferdams and installing new ones, this innovative upgrade solution halves the time it takes to upgrade an underwater lighting system. A huge benefit for the yard and owner.

## ELEVATED PERFORMANCE.

Upgrading to the Explore E8 underwater lighting solution offers significant performance gains over the F-Series. Producing up to 13,000 fixture lumens and equipped with our most advanced underwater specific light optics, the Explore E8 creates an unrivalled effect.

## INCREASED EFFICIENCY

The Explore E8 underwater lighting solution offers exceptional efficiency gains, in comparison to older superyacht specific underwater lighting solutions. The Explore E8 boasts an incredible 26% efficiency gain, specifically relating to the amount of power needed to create the equivalent lighting performance.

## FUTURE PROOFED SOLUTION

Utilising the F-Series to Explore E8 Upgrade Kit ensures future compatibility. With the kit in place, the vessel retains the ability to upgrade its underwater lighting solution to the latest generation of OceanLED Explore Series superyacht lights.

## GREEN CREDENTIALS

Accredited by the Water Revolution Foundation, the Explore E8 is the only proven sustainable underwater lighting solution for superyachts. Independent Water Revolution testing revealed significant improvements in all environmental indicators of up to 61.8%, when compared to the E8's nearest industry competitor.

## STANDARD KIT

### CONTENTS

**F-Series to Explore E8 Adaptor Ring - Light Kit**  
Part: 023122
