

Superyacht & Custom Projects Warranty Statement

This warranty statement is for those products supplied to OEMs, electrical contractors or shipyards for custom projects managed by Ocean LED Marine LTD.

OceanLED provides a full 2- or 3-years' manufacturer's warranty on all its products from date of handover to the owner, providing that OceanLED are notified of this date within 1 month. If OceanLED is not notified of this date, the warranty period will start on the date of delivery of the products. The warranty period for a specific product can be found in the list of product warranty periods, downloadable from www.oceanled.com.

The warranty can be extended by an additional year if purchased prior to the commissioning of the yacht's under water lighting. Commissioning of a system on its own does not automatically guarantee an extended warranty but commissioning by OceanLED must be completed to qualify for the extended warranty if purchased.

The warranty period shall commence on the date the vessel is handed over to the owner, providing that OceanLED be notified of this within 1 month. If no notification of handover is received within 1 month, the warranty period shall commence on the date commissioning was completed. The extended warranty coverage will only be valid if a signed copy of the commissioning report is returned to OceanLED on completion of the commission.

To claim, please contact OceanLED Custom Projects team on superyachts@oceanled.com. Prior to doing so, please review the troubleshooting guidelines on the relevant product installation manuals, which are available at www.oceanled.com to download. Please also gather the following information:

- Customer name
- Vessel name, hull number or project name
- Current location of the vessel or products
- Description of the failure in detail along with photographic evidence
- Details of any tests that have already been conducted
- Serial number(s) of affected product(s)

Claims may be disputed if the troubleshooting guidelines are not completed, information provided is incomplete or no defect is found with the product. The detailed terms and conditions of this warranty are set out below.

OceanLED cannot be held responsible for corrosion-related defects. This includes issues caused by water being allowed to enter the cable as a result of immersion in water during the installation or improper sealing of connections. Please note corrosion will be particularly aggressive if installation and/or bonding have not been undertaken properly; or if stray currents are active in the vicinity of a boat. In neither case will a warranty claim be accepted.

Colour variation occurs during LED manufacture and is inherent to the manufacturing process for all LED types. Whilst OceanLED makes every effort to match the colour of our lights, there may be a noticeable difference between batches of LED lights. OceanLED does not warrantee colour variation on lights.

OceanLED reserves the right to change the design, range and components of our products without any prior written or verbal communication.

OceanLED is not liable for any ancillary or indirect costs including but not limited to haul out of vessels, scaffolding and lifting equipment, nor the organisation of these services. OceanLED does not cover the cost of labour associated with warranty claims.

Where returned products are significantly damaged, have not got a sufficient cable length for testing (30cm), are incomplete or where matching sub-assemblies cannot be identified, an investigation into the failure mechanism may not be possible and warranty will be voided. Where failed product cannot be removed without causing damage, please contact OceanLED in advance to discuss your options on a case by case basis.
