

# OCEANCONNECT JUNCTION BOX

## SPECIFICATION SHEET

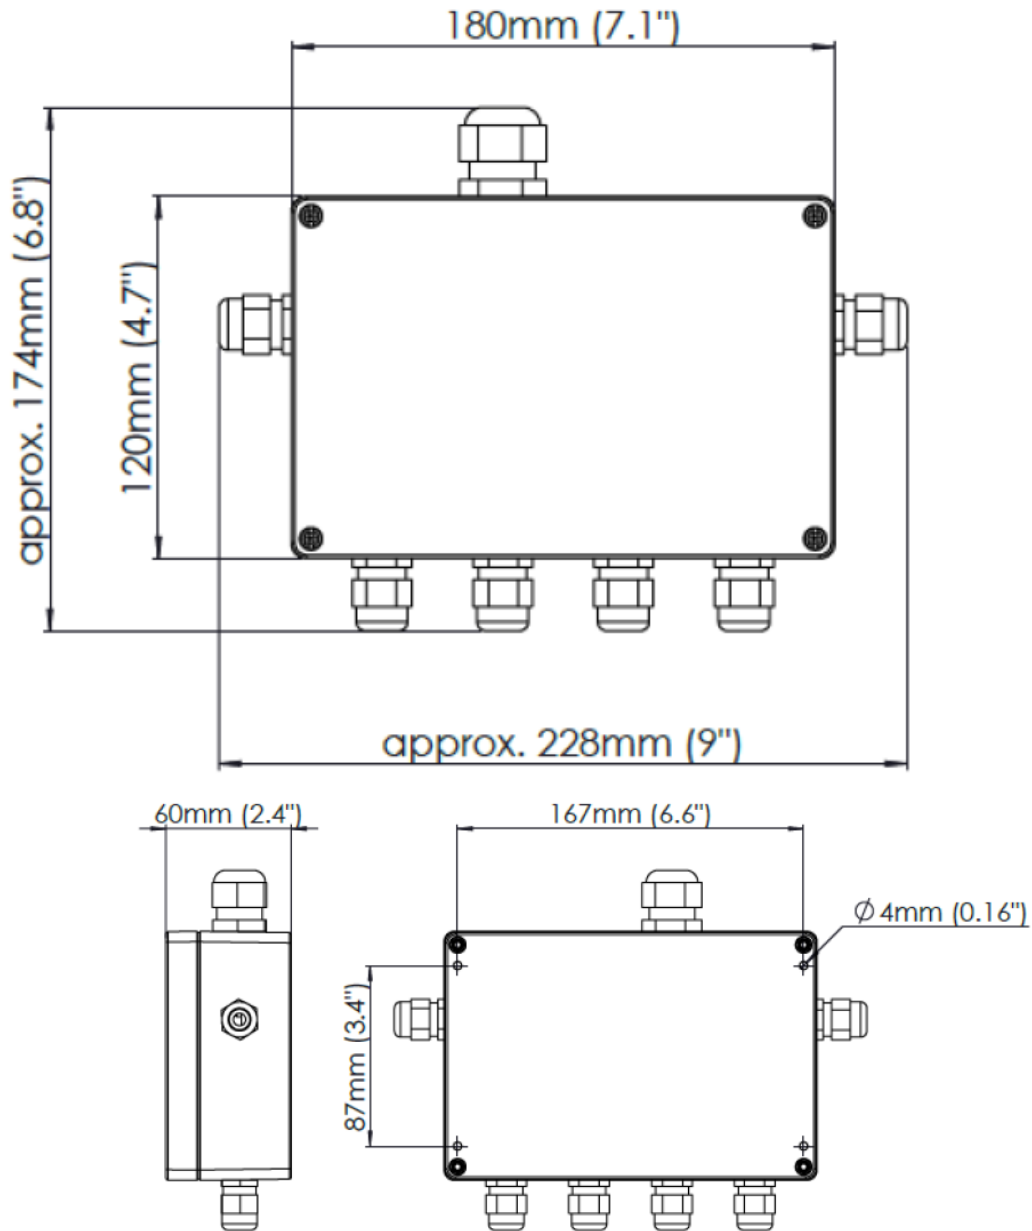

The OceanConnect is an intelligent DMX junction box, developed by the engineers at OceanLED to work with the X-Series DMX range, as well as all non-DMX DC-powered single and dual colour lights.

The addressable junction box allows upto four individually addressed fused DC outputs to be controlled per junction box. The system also allows lights to be zoned depending on their place of installation.

The IP66 OceanConnect unit is made from robust polycarbonate materials and should be mounted in a protected area within the vessel.

PHYSICAL		CONTENTS	
Material	Polycarbonate	OceanConnect Junction Box	
Dimensions	180mm x 120mm x 60mm (7.1" x 4.7" x 2.3")	Screw and Gromit Kit	
Weight	270g	PART NUMBERS	
TECHNICAL		OceanConnect Junction Box	013204
Operating Voltage	12/24v (10V - 32V) DC	COMPATIBLE PRODUCTS	
Input Output Cable Glands	IP68 (1x M20, 4x M16)	X-Series	
Input terminals wire gauge	8 to 20 AWG	Sport Dock Light- Single Colour & Dual Colour	
Output terminal wire gauge	12 to 28 AWG	Sport Series - Single Colour & Dual Colour	
Outputs	4 x individual fused 6 Amp each max	Explore E3 - Single Colour & Dual Colour	
		Discover D3
