

OceanBridge FIRMWARE UPDATE GUIDE

Download the update file to a USB stick provided.* (Must be 4G or larger). Plug the USB into the port on the right hand side of your OceanBridge unit.

*USB stick provided is formatted to FAT32. Most USBs are formatted to FAT32 as standard. Required for update.

Navigate to: Menu > System > Firmware Update.

LIGHT. YEARS AHEAD.

STEP 3

Select 'FIRMWARE UPDATE' button

OceanLED Firmware
FIRMWARE UPDATE

If firmware is found a pop-up message will show. Select 'UPDATE' to initiate the firmware update process.

OceanLED Firmware
Firmware Update

The screen will show an update message, and the updating process is expected to take approximately 6-7 minutes.

Firmware			
	FIRMWARE UPDATE		
	OceanBridge is currently updating Do not attempt to use please wait.		
	This is update 1.0.0-release Unzipping files from usb /update-1.0.0-release/ /update-1.0.0-release/oceanled.dtb /update-1.0.0-release/oceanled-update-1.0.0-releas e.sh /update-1.0.0-release/oceanled-image-txmp-1571.ex t4 /update-1.0.0-release/ulmage running oceanled-update-1.0.0-release found rootfs update found kernel update found dtb update found dtb update		

Once the firmware update is complete, the update message screen will close.

Navigate to: Menu > Info to confirm whether the correct firmware version has been installed.
